MSLR Propulsion

The Mast is forged in a single piece from pure high density 3k carbon fibre and is available in a 70 cm kit. The motors small dimension minimizes resistance and takes advantage of kinetic energy when decreasing the power. The developed brushless motor and gear head produce thrust to fly at up to 35 km/h. An outstanding propeller system brings fast response of power delivery. Includes a carbon fibre mast, custom 6kW direct drive brushless motor, milled Aluminum anodized propeller and electrical contacts.

MSLR Free Flow Remote System

Features:

MSLR Free Flow Remote System is the worlds most advanced remote control for your E-Foil. A bright 1.8-inch screen shows you all the information you need, to stay connected and updated all the time. Monitor and log your power consumption, current, speed, voltage and more. Improve your ride with a wide variety of functions. MSLR Free Flow App Available on the APP store.

MSLR Free Flow Remote System

Features:

- Bright Screen - Premium Quality
- 8 Hours Of Run Time
- Durable Injection Moulded Housing
- Perfect Grip In Wet Conditions
- Custom App To Log Your Flight Data
- 2.4 GHZ Stable Communication
- Save Your Ride Data To SD Card
- Create Your Own Custom MSLR Public Profile
